

THEATERS PORTFOLIO
TO BE CONTINUED ...

CARIGNANO THEATRE – TORINO, ITALIA

We supplied the chairs of the hall of this historical Italian theatre. Those chairs were realized following the design of the designers, reproducing their old yellow-striped red velvet, further enhanced by a fireproof yarn. In addition, we renovated and adapt the original box and royal box seats to the new security regulations, to the complete satisfaction of designers and customers.

SALA DE CONCERTOS MINAS GERAIS - BELO HORIZONTE, BRASILE

Project: Architect Jose Augusto Nepomuceno

This was definitely a unique project, thanks to the peculiar design of the concert hall.

Mazzoli manufactured and supplied 1477 armchairs characterized by 3 different colors and heights and 2 distinct widths. The whole project is organized on 3 floors: orchestra, 5th floor and 6th floor. The concert hall is divided into two parts and the numeration of the seats separates the right part from the left side. This is different from what usually happens: normally the numbers of the seats increase and continue in each row. The 3 colors chosen by the customer (light blue, blue and grey) were disposed randomly in the concert hall, in order to achieve a special and surprising color effect. Besides standard armchairs, Mazzoli also supplied 90-centimeter wide armchairs for overweight people. Those armchairs were tested with a weight of 400 kgs. Moreover, other special armchairs with removable arm for semi disabled people were provided, as well as completely removable armchairs and chairs for the terraces.

Sala de Concertos Minas Gerais is a place you just can't miss!

AUDITORIUM & THEATRE OF "ECOLE INTERNATIONALE DE GENEVE" – GENEVE, SWITZERLAND

Project: Architect Jean Michel Wilmotte

The architecture firm Wilmotte designed the Centre des Arts of the Ecole Internationale de Genève, which includes a 400 seat auditorium and a theater with a capacity of 200 places.

Mazzoli realized the armchairs for both the auditorium and the theater. The extraordinarily comfortable armchair designed by Architect Wilmotte is characterized by the wooden parts on its back and on the sides of its arms.

AUDITORIUM GARABAG RESORT&SPA – NAFTALAN, AZERBAIJAN

High quality supply for Garabag Resort & Spa in Naftalan, Azerbaijan. This is definitely further proof that Made in Italy is appreciated worldwide.

SOCIALE THEATRE – BERGAMO, ITALIA

We completely renovated, modified and brought up to standard the historical chairs of the Carignano Theatre in Turin, in order to fill the stalls of the Sociale Theatre in Bergamo. Therefore, this theatre was brought to new life and splendor after two-hundred years of ups and downs. Moreover, our supply was completed by the boxes seats, the hall curtains, the furnishing of the cloakroom and the fittings of the toilet facilities.

GRANDE THEATRE – BRESCIA, ITALIA

We did this important work for our local theatre. In order to let the pipes of the fire system pass, we had to upholster a wall in every box, managing to reproduce the original historical fabric.

We renovated and brought up to standard the chairs of the stalls. In addition, we turned the loggione into galleries, also remodeling the terraces, by providing a smaller but equally comfortable version of the seats of the stalls.

Moreover, we carpeted all the boxes, corridors and stairs. We also realized the hall curtains.

SOCIALE THEATRE – BRESCIA, ITALIA

This is perhaps the best work we have ever made: as a matter of fact, we got real gratification from our intervention.

We were awarded the contract competing with the famous Poltrona Frau: this professional award definitely paid off our efforts.

The chairs were realized following exactly and faithfully the designs, ideas and suggestions of the project manager. With this same cooperation, step by step, seam after seam, we realized the beautiful stage curtain. We also provided the hall curtains and the fittings of the dressing rooms, as well as those of the toilet facilities.

VITTORIO ALFIERI THEATRE – ASTI, ITALIA

We supplied all the seats of the hall, the boxes and the loggione chairs and the small armchairs, the armrests and finally the handrails of the boxes, covered with the same velvet of the seats.

In addition, we provided and laid down the fireproof wall covering inside the boxes.

We also provided the fittings of all the artists' dressing rooms, the toilet facilities and the orchestra pit, where we supplied chairs and music stands.

SOCIALE THEATRE – MONTICHIARI, ITALIA

This is another nice realization of ours. We “tailored” this theatre from floor to ceiling. We provided the fittings of the foyer, the cloakroom, the bar, the seats of the hall (their model was designed by a designer, and then we realized them, adding to the seats a new tilting system we had previously patented).

We turned the loggione into a gallery, and supplied the same chairs of the hall.

We covered the boxes with fabric, and the original pattern was reproduced with fireproof fibers, in order to adapt to the latest fire norms. The furniture of the boxes was enhanced by chairs, small chairs and velvet benches (the same used for the seats in the hall).

S. CARLO THEATRE – ROVATO, ITALIA

We are very satisfied about this small realization in Rovato.

Even though it was a minor supply (the theatre can hold one-hundred people), we are very proud both of the result we have achieved and of the short time it took us to carry out the project. As a matter of fact, starting from the arrival of raw materials, our team produced and laid down all the seats in five days.

The entire project was realized in close collaboration with Architect Fogazzi, who planned the renovations.

The result we achieved was indeed a small realization, as we have already said. However this theatre is every bit as outstanding as major structures, thanks to the quality of its seats, finishes and fittings.

COMUNALE THEATRE – LENO, ITALIA

This small theatre was completely renovated, and it was a clean break with the past. We realized the innovative designer's chairs with care, ability and experience. As a consequence, the result was commonly considered to be great. Besides the seats in the stalls and in the gallery, we also supplied the hall curtains, the stage with moving platforms and the motorized theatre curtains.

DEL CASSERO THEATRE – CASTEL SAN PIETRO TERME, ITALIA

This theatre was created in a 1199 historical tower. We completely furnished it, starting from the carpeting and the seats (which were modified and redesigned thanks to a close collaboration with the designer). We also provided the hall and stage curtains (backstage curtains, harlequin curtains, pelmets, etc.), the bar counters both in the foyer and in the open air theatre located on the tower terrace. In addition, we supplied the outdoor steel stage and the thick teak tables.

EX FONDERIE LIMONE – MONCALIERI, ITALIA

The contract did not comprise the multipurpose room. Therefore, we just supplied the bar counter with chairs and tables, the cloakroom, the ticket booth, the sofas and small tables in the lounge, the foyer's big round benches and the big chandeliers over them (we engineered two of those chandeliers starting from a designer's design).
